

INPOINT
COMMERCIAL REAL ESTATE INCOME, INC.

A Commercial Mortgage REIT

Designed to provide an alternative source of income by investing in commercial real estate credit, an asset class that can be used to **diversify an investment portfolio and lower portfolio volatility**

There is no assurance that we will achieve our investment objectives. Past performance is not a guarantee of future results. InPoint's share price is subject to less volatility compared to public equities and fixed-income investments because its per share NAV is based on the value of real estate assets it owns and is not subject to public market pricing forces as is the price of public equities and fixed-income investments. Although InPoint's share price is subject to less volatility compared to exchange-listed or other actively traded equities and fixed-income products, because there is no market price readily available it can be difficult to determine the value of a share or the performance of your investment, and the value of real estate loans may fluctuate and be worth less than was initially paid. InPoint shares are significantly less liquid than exchange-listed or other actively traded equities and fixed-income products and are not immune to fluctuations.

This sales and advertising literature is neither an offer to sell nor a solicitation of an offer to buy securities. An offering is made only by the prospectus. **This literature must be read in conjunction with the prospectus in order to fully understand all of the implications and risks of the offering of securities to which the prospectus relates. A copy of the prospectus must be made available to you in connection with any offering.** No offering is made except by a prospectus filed with the Department of Law of the State of New York. Neither the Securities and Exchange Commission, the Attorney General of the State of New York, nor any other state securities regulator has approved or disapproved of these securities or determined if the prospectus is truthful or complete. Any representation to the contrary is a criminal offense. **This material is not for use in the States of New Jersey or Ohio.**

Risk Factors

InPoint Commercial Real Estate Income, Inc.

Investments in commercial real estate (CRE) credit and related securities (e.g., CMBS) are subject to the risks typically associated with CRE which include, but are not limited to: market risks such as local property supply and demand conditions; tenants' inability to pay rent; tenant turnover; inflation and other increases in operating costs; adverse changes in laws and regulations; relative illiquidity of real estate investments; changing market demographics; acts of nature such as earthquakes, floods or other uninsured losses; interest rate fluctuations; and availability of financing.

Investing in our common stock involves a high degree of risk. You should purchase these securities only if you can afford the complete loss of your investment. You should carefully review the "Risk Factors" section of the prospectus for a more detailed discussion. Some of the more significant risks relating to an investment in our shares include:

- This is a "blind pool" offering. You will not have the opportunity to evaluate our future investments before we make them.
- Since there is no public trading market for shares of our common stock, repurchase of shares by us will likely be the only way to dispose of your shares. Our share repurchase plan was suspended by our board of directors on March 24, 2020 because of the effects of the COVID-19 pandemic and was not reinstated for all stockholders until July 1, 2021.
- Under our share repurchase plan, stockholders who have held their shares for at least one year have the opportunity to request that we repurchase their shares on a monthly basis, but we are not obligated to repurchase any shares and may choose to repurchase only some, or even none, of the shares that have been requested to be repurchased in any particular month at our discretion. In addition, repurchases are subject to available liquidity and other significant restrictions. Further, our board of directors may modify, suspend or terminate our share repurchase plan if it deems such action to be in our best interest and the best interest of our stockholders. As a result, our shares should be considered as having only limited liquidity and at times may be illiquid.
- We cannot guarantee that we will pay distributions, and if we do, we have funded and may again fund such distributions from sources other than earnings and cash flow from operations, including, without limitation, the sale of assets, borrowings, return of capital or offering proceeds, and we have no limits on the amounts we may pay from such sources.
- The purchase and repurchase price for shares of our common stock are generally based on our prior month's NAV (subject to material changes as described in the prospectus) and are not based on any public trading market. The valuation of our investments is inherently subjective, and our NAV may not accurately reflect the actual price at which our investments could be liquidated on any given day.
- We have no employees and are dependent on the Advisor and the Sub-Advisor to conduct our operations. The Advisor and the Sub-Advisor face conflicts of interest as a result of, among other things, the allocation of investment opportunities among us and Other Sound Point Accounts the allocation of time of their investment professionals and the substantial fees that we pay to the Advisor and that the Advisor pays to the Sub-Advisor.
- This is a "best efforts" offering. If we are not able to raise a substantial amount of capital on an ongoing basis, our ability to achieve our investment objectives could be adversely affected.
- If we fail to maintain our qualification as a REIT and no relief provisions apply, we will have to pay corporate income tax on our taxable income (which will be determined without regard to the dividends-paid deduction available to REITs) and our NAV and cash available for distribution to our stockholders could materially decrease.
- The COVID-19 pandemic has adversely affected the economy and our investments and operations, including decreases in the fair value of the collateral underlying our short-term borrowings, and may have additional adverse effects in the future.
- We own the Renaissance Chicago O'Hare Suites Hotel, and for so long as we own hotels or invest in loans secured by hotels and securities collateralized by hotels, we will be exposed to the unique risks of the hospitality sector, including seasonality, volatility and the severe reduction in occupancy caused by the COVID-19 pandemic.
- We use short-term borrowings to finance our investments, which exposes us to increased risks associated with decreases in the fair value of the underlying collateral resulting from adverse changes in the financial markets, including as a result of the COVID-19 pandemic.

As with any investment, there are certain risks associated with credit investing. Such risks include, but are not limited to:

- The risk of nonpayment of scheduled interest or principal payments on a credit investment, which may affect the overall return to the lender;
- Interest rate fluctuations, which will affect the amount of interest paid by a borrower in a floating-rate loan that adjusts to current market conditions;
- Default risk, which means that the loan may not be repaid by the borrower; and
- The risks typically associated with real estate assets described above.

Inland Securities Corporation, member FINRA/SIPC, is dealer manager for InPoint Commercial Real Estate Income, Inc.

Forward Looking Statements

Communications by InPoint Commercial Real Estate Income, Inc. or its representatives contain "forward-looking statements," which are not statements of fact. These statements may be identified by terminology such as "hope," "may," "can," "would," "will," "expect," "intend," "estimate," "anticipate," "plan," "seek," "appear," or "believe." Such statements reflect our current view with respect to future events and are subject to certain risks, uncertainties and assumptions related to numerous factors including, without limitation, risks related to blind pool offerings, best efforts offerings, use of short-term financing, borrower defaults, changing interest rates, the effects of the COVID-19 pandemic, particularly on hospitality and retail properties, including our hotel, and on related mortgage loans and securities, and other factors detailed under Risk Factors in our prospectus, if you are purchasing securities from us, or our most recent Form 10-K and subsequent Form 10-Qs and Form 8-Ks on file with the SEC and available online through www.sec.gov or our website at <https://inland-investments.com/inpoint/sec-filings>. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. You should exercise caution when considering forward-looking statements and not place undue reliance on them. Should any one or more of these risks or uncertainties materialize, or should any underlying assumptions prove incorrect, actual results may vary materially from those described on the website. Except as required by federal securities laws, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason after the date they are first made.

InPoint Commercial Real Estate Income, Inc. (InPoint) seeks to pay attractive and stable cash distributions and preserve capital by originating **floating-rate commercial real estate mortgages** (credit).

There is no assurance that we will achieve our investment objectives.

Why Commercial Real Estate Credit?

Favorable Environment for Attractive Income Potential and Portfolio Diversification

- Floating-rate CRE mortgages may be an effective hedge against rising rates and inflation
- Loan terms allow for rate adjustment in tandem with interest rates and can provide attractive income even if rates increase
- Senior secured loans historically have provided high total returns with less volatility than comparable fixed-income investments
- CRE mortgages may help provide more stability to a portfolio with consistent returns throughout real estate and economic cycles

¹Past performance is not a guarantee of future results. Benchmarks shown are for illustrative purposes only. An investment cannot be made directly in an Index. InPoint's performance may be lower or higher and may differ substantially than the indices shown. An investment in a non-listed REIT is not a direct investment in commercial real estate. There are significant differences between commercial real estate and non-listed REITs. CRE first mortgages are represented by the LifeComps Commercial Mortgage Loan Index which measures actual private commercial mortgage market loan cash flow and performance data collected quarterly from participating life insurance companies since 1996. Commercial mortgages may be subject to default risk. Investment Grade Corporate Bonds are represented by the Bloomberg Barclays Investment Grade Corporate Bond Index, which measures the U.S. dollar denominated investment grade, fixed-rate, taxable corporate bond market. Corporate bonds may be subject to default and interest rate risk. Leveraged Loans are represented by the S&P LSTA Leveraged Loan Index, which is designed to reflect the performance of the largest facilities in the leveraged loan market. High Yield Bonds are represented by the Bloomberg Barclays US Corporate High Yield Index, which measures the U.S. dollar-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Each asset class is suitable for specific investor objectives, which vary greatly. Data available upon request.

Attractive Recent Distributions

6.32% annualized distribution rate for distribution on Class I Shares to record holders as of May 31, 2022*

*Source of Distribution - For the year ended December 31, 2021, 94% of distributions on our common stock were funded by cash flows from operating activities, and 6% of those distributions were paid from the combined net proceeds of our public offerings of common stock and preferred stock. Distributions on our common stock in 2021 were 63% covered by GAAP net income attributable to common stockholders. The distribution rate reflects the current month's distribution annualized and divided by the NAV as of the end of the month prior to the record date for the distribution.

Annualized monthly distribution rates of distributions to Class I holders since June 30, 2021 have ranged (lowest to highest) from a 6.15% annualized rate of the distribution to record holders as of August 31, 2021 to an annualized rate of 6.32% on the distribution to record holders as of May 31, 2022. The distributions received by holders of Class D, Class S and Class T common stock will be less than the distribution amounts received by holders of Class I and other classes because the amount of the distributions received by Class D, Class S and Class T holders are net of stockholder servicing fees applicable to these classes, respectively. See "Distributions" under the Management's Discussion and Analysis section of our Annual Report on Form 10-K, and subsequent Quarterly Reports on Form 10-Q for additional detail regarding the amount of our distributions, including the amount of distributions relative to our cash flows from operating activities. InPoint cannot guarantee that it will declare and pay distributions.

Strong Demand for Commercial Real Estate Credit

\$5 Trillion U.S. CRE Credit Market Spans Geographies and Property Types

- Incorporating an allocation to CRE credit has historically generated differentiated sources of income and may benefit a multi-asset portfolio outside of the traditional 60/40 model
- Modern portfolio theory advocates diversification to minimize overall volatility or “risk” by investing in a variety of asset classes to weather different market conditions
- Large and diverse \$5 trillion CRE credit investment opportunity with \$2.3 trillion of mortgages set to mature by 2026²
- Complements a real estate equity allocation and provides the opportunity to diversify a traditional fixed-income portfolio

\$2.3 Trillion of CRE Mortgages to Mature by 2026

Portfolio Diversification Through Low Correlation³

Investors often rely on fixed income allocations to complement stock portfolios. By investing in assets with negative or low correlation to stocks, investors have the potential to diversify traditional portfolios. The lower the correlation between two investments, the less likely they will move up and down at the same time. CRE credit’s low correlation to the S&P 500 Index and other investments listed below over the last 20 years provides evidence that CRE credit has the potential to diversify traditional portfolios.

20-Year Correlation Review (1/1/2002 - 12/31/2021)

	S&P 500	Investment Grade Corporate Bonds	High Yield Bonds	Leveraged Loans	CRE First Mortgages
S&P 500	1.00				
Investment Grade Corporate Bonds	0.29	1.00			
High Yield Bonds	0.69	0.59	1.00		
Leveraged Loans	0.56	0.43	0.83	1.00	
CRE First Mortgages	0.09	0.33	0.26	0.25	1.00

²Trepp, Inc. CRE Loan Growth – Outstanding Debt Reaches \$5 Trillion in Q3 2021. December 22, 2021. Data available upon request. Information is projected and actual results may vary.

³CRE first mortgages are represented by the LifeComps Commercial Mortgage Loan Index which measures actual private commercial mortgage market loan cash flow and performance data collected quarterly from participating life insurance companies since 1996. Commercial mortgages may be subject to default risk. Investment Grade Corporate Bonds are represented by the Bloomberg Barclays Investment Grade Corporate Bond Index, which measures the U.S. dollar denominated investment grade, fixed-rate, taxable corporate bond market. Corporate bonds may be subject to default and interest rate risk. Leveraged Loans are represented by the S&P LSTA Leveraged Loan Index, which is designed to reflect the performance of the largest facilities in the leveraged loan market. High Yield Bonds are represented by the Bloomberg Barclays US Corporate High Yield Index, which measures the U.S. dollar-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody’s, Fitch and S&P is Ba1/BB+ /BB+ or below. Each asset class is suitable for specific investor objectives, which vary greatly. Data available upon request.

CRE Loans Generally Have Performed Well Across Market Cycles⁴

- Quarterly CRE loan net charge-offs have averaged 0.48% over the last 25 years
- Historically, CRE loan net charge-offs have only spiked during major financial crises, and loans have performed well overall through up and down economic cycles
- CRE loan net charge-off rates include construction lending, which is not a focus of InPoint's investment strategy

InPoint's Primary Investment Strategy

- Originate, acquire, and manage a diversified CRE credit portfolio comprised of first mortgage loans and credit loans, backed by income-producing properties
- Primarily floating rate senior secured investments where the interest typically adjusts every 30 days
- Thorough investment process with underwriting based on third-party reports, site visits and other review criteria to identify quality properties owned by experienced operators

- Senior management team has an average of **21 years' experience** in credit markets

Portfolio Managers with \$100B+ CRE-Related Transactions

InPoint's portfolio managers are regarded for their comprehensive financial, structural, operational and legal due diligence to assess the risks associated with originating loans.

Donald MacKinnon
Portfolio Manager
Sound Point

33 Years of Experience

Matthew Donnelly
Head of Originations
Sound Point

26 Years of Experience

The InPoint Opportunity

Traditional sources of income alone may not support ongoing Investor needs. Investing in CRE credit provides an alternative source of income and diversification, while also providing an alternative way to invest in real estate. Consider an allocation to commercial real estate credit for potential:

- Income**
- Capital Preservation**
- Diversification**
- Lower Portfolio Volatility**

There is no assurance that we will achieve our investment objectives. InPoint's share price is subject to less volatility compared to public equities and fixed-income investments because its per share NAV is based on the value of real estate assets it owns and is not subject to public market pricing forces as is the price of public equities and fixed-income investments. Although InPoint's share price is subject to less volatility compared to exchange-listed or other actively traded equities and fixed-income products, because there is no market price readily available it can be difficult to determine the value of a share or the performance of your investment, and the value of real estate loans may fluctuate and be worth less than was initially paid. InPoint shares are significantly less liquid than exchange-listed or other actively traded equities and fixed-income products and are not immune to fluctuations.

⁵The Inland Real Estate Group of Companies, Inc. comprises a group of independent legal entities some of which may be affiliates, share some common ownership or have been sponsored and managed by subsidiaries of Inland Real Estate Investment Corporation (Inland Investments). Capital raised as of Q4 2021. Inland InPoint Advisor, LLC, a wholly owned indirect subsidiary of Inland Real Estate Investment Corporation, acts as the advisor.

⁶AUM as of December 31, 2021. SPCRE InPoint Advisors, LLC is an affiliate of Sound Point Capital Management, LP (Sound Point) and acts as InPoint's sub-advisor.

Debt Investments: Floating vs. Fixed Rate

All Investments by Type¹⁰

Loans by Region

Loans by Property Type

InPoint invests primarily in floating rate senior loans secured by commercial real estate properties across the U.S.

We believe floating rate senior secured lending is well positioned for yield and value preservation across market cycles.¹⁰

⁷Portfolio size is based on the unpaid principal balance of our debt investments and the fair value of our real estate owned (REO) in each case as of March 31, 2022. Portfolio size, average investment balance and number of investments include our REO.

⁸1st mortgage weighted average years to maturity based on the maturity date assuming no options to extend are exercised. See our Form 10-K or 10-Q most recently filed with the SEC for maximum maturities assuming all extensions are exercised.

⁹Weighted average of the loan to values at origination, based on current loan balance as of March 31, 2022.

¹⁰Based on the par value of investments as of March 31, 2022. Subject to change without notice. First mortgage loans finance commercial real estate properties and are loans that generally have the highest priority lien among the loans in a foreclosure proceeding on the collateral securing the loan. The senior position does not protect against default, and losses may still occur. Past performance is not a guarantee of future results, and there is no assurance that we will achieve our investment objectives. Credit loans, also called mezzanine loans, are secured by one or more direct or indirect ownership interests in an entity that directly or indirectly owns real estate. REO, which stands for "real estate owned," represents real estate we have acquired through foreclosure, deed-in-lieu of foreclosure, or purchase.
